

BOLT EV 2019

CHEVROLET

Bolt EV Premier in Silver Ice
Metallic with available features.

AN EXTRAORDINARY VEHICLE THAT JUST HAPPENS TO BE ELECTRIC.

Bolt EV is revolutionizing the global automotive landscape as an award-winning all-electric crossover that offers up to 238 miles of pure electric range on a full charge.¹

Designed from the inside out for the driver and passengers, Bolt EV offers something for everyone. Bolt EV accelerates to 60 mph in 6.5 seconds from a start.² A low center of gravity helps deliver a planted feeling and agile handling. Plenty of functional space provides room for five and 56.6 cu. ft. of maximum cargo room with the rear seats folded down.³

Because everything has been designed around your needs, Bolt EV aims to simplify your life. After all, charging the battery can be as easy as plugging in a cell phone. Plus, with the perfect combination of range, utility and style, Bolt EV isn't just a great electric vehicle. It's a great vehicle, period.

¹ EPA-estimated 238-mile EV range. Your actual range will vary based on several factors including temperature, terrain and driving conditions. ² Based on initial vehicle movement. ³ Cargo and load capacity limited by weight and distribution.

¹ EPA-estimated 238-mile EV range. Your actual range will vary based on several factors including temperature, terrain and driving conditions. ² Regenerative braking performance may be limited when the battery is cold or near full charge. See chevrolet.com for details. ³ Based on initial vehicle movement.

GO THE DISTANCE. Bolt EV offers an EPA-estimated 238 miles of range on a full charge¹, which can mean five times the amount needed for an average daily round-trip commute of 40 miles – enough for your commute and some stops in between.

INVIGORATING EFFICIENCY. With smooth handling and plenty of get-up-and-go, Bolt EV is a fun-to-drive vehicle that happens to be electric. Features like

Regen on Demand^{TM2} and One Pedal Driving are engineered to help improve energy usage and efficiency!

CONVERT AND CONSERVE. Regen on Demand allows you to convert kinetic energy into energy stored within the battery for future use. A simple pull and hold of the Regen on Demand paddle on your steering wheel can decelerate your vehicle² and store energy.

SPRINT AND MARATHON. One Pedal Driving helps get you where you want to go efficiently! While driving in Low mode at any speed, One Pedal Driving lets you speed up and slow down by using only the accelerator pedal? When you want to speed up, press your foot down like you normally would. And when you want to slow down, just lift your foot off the accelerator. One Pedal Driving helps you capture some of the energy from the moving vehicle and

turns it back into electrical energy, which is then stored in the battery. Of course, you should always use your brake pedal if you need to stop quickly.

GO TO CHEVY.COM/BOLTEV

BASIC – 120-VOLT

UP TO 4 MILES PER HOUR OF CHARGE¹

HOME + PUBLIC STATIONS

CHARGE ON A DAILY BASIS

- 120-volt charging capability comes standard.
- 120-volt portable charge cord comes standard with the vehicle.

BENEFITS

- Gives owners the opportunity to top off their charge.
- Charge anywhere there's a 120-volt 3-prong outlet.

FAST – 240-VOLT

UP TO 25 MILES PER HOUR OF CHARGE¹

HOME + PUBLIC STATIONS

CHARGE WHENEVER YOU WANT OR GO DAYS WITHOUT PLUGGING IN

- 240-volt charging capability comes standard.
- The recommended 240-volt charging unit (professional installation required) is available for purchase through your Chevrolet dealer or GM Accessories.
- 240-volt charging is available at most public charging stations.

BENEFITS

- A convenient way to charge at home.
- Easily top off your charge at any time.
- If you drive an average daily commute of 40 miles, you could fully replenish the battery in less than 2 hours¹
- From empty, fully replenish the battery in about 9.5 hours¹ with a 32-amp Level 2 charger unit.

SUPER FAST – DC FAST CHARGE

UP TO 90 MILES OF RANGE IN ABOUT 30 MINUTES OF CHARGE¹

PUBLIC STATIONS ONLY

CHARGE WHILE AWAY FROM HOME, WHETHER YOU'RE GRABBING LUNCH OR RUNNING ERRANDS

- DC Fast Charge capability is available to Bolt EV owners for an additional cost.
- Requires available DC Fast Charge port.
- Available at participating locations.

BENEFITS

- Accelerated charging times.
- Convenient for those who are out and about and need to top off their charge while parked.

DESIGNED FOR EFFICIENCY.

The Bolt EV battery is engineered to provide maximum range. Bolt EV also offers owners added peace of mind with Chevrolet Complete Care, which includes battery and electric component coverage for 8 years or 100,000 miles, whichever comes first.

INSTANT ACCESS ALMOST EVERYWHERE.

Every Bolt EV comes with a ChargePoint card in the glove box that allows access to thousands of public charging stations nationwide. The ChargePoint app lets you find available charging spots and start charging. Just activate your card, swipe and go.

¹ Charging rate varies based on output of the charge unit, vehicle settings and outside temperature.

1

1. EXPLORE YOUR OPTIONS. Charging your Bolt EV is simple, like plugging in your cell phone, with the available 240-volt charging unit (professional installation required). This powerful charging unit can charge your Bolt EV up to five times faster than with the 120-volt portable charge cord!

2. MONITOR YOUR RANGE. The 8-inch diagonal Driver Information Center and 10.2-inch diagonal color touch-screen display range information. You can also find range information on the myChevrolet Mobile App²

2

3

3. SUPER FAST CHARGING. For equipped vehicles, DC Fast Charging is available at conveniently located public charging stations and provides up to 90 miles of range in about 30 minutes of charge! Use the available myChevrolet Mobile App² to find the closest DC Fast Charging station.

¹ Charging rate varies based on output of the charge unit, vehicle settings and outside temperature. ² Available on select Apple and Android devices. Service availability, features and functionality vary by vehicle, device and the plan you are enrolled in. Device data connection required. Unlock feature requires automatic locks. Remote start requires GM factory-installed and enabled remote start system. Does not monitor spare tire. Visit onstar.com for details and limitations.

DESIGN

¹ EPA-estimated 238-mile EV range. Your actual range will vary based on several factors including temperature, terrain and driving conditions. ² The system wirelessly charges one PMA- or Qi-compatible mobile device. Some devices require an adaptor or back cover. To check for phone or other device compatibility, visit my.chevrolet.com/learn for details.

SMART AND STYLISH. A crossover designed from the inside out, Bolt EV turns heads for its looks as well as its amazing range! With beautiful proportions and eye-catching details, you may have to look twice to notice that it's an electric vehicle. Sculpted bodysides and strong wheel arches project a solid presence on the road.

DESIGNED FOR COMFORT. The creative design seats five passengers comfortably, with ample head, shoulder and leg room. A multipurpose front console delivers plenty of functionality with a sliding armrest and generous storage bins. Conveniently placed cup holders and available wireless charging² behind the shifter make every ride a little easier.

ENGINEERED FOR EFFICIENCY. The placement of the Bolt EV battery allows for increased spaciousness and easy entrance and exit for you and your passengers. The rear cargo area features a deep well with an available false cargo floor for additional storage.

1. TAKE A CHAIR. Or lots of other things you need to move. In addition to effortless entry and exit for five, Bolt EV accommodates cargo with equal comfort. Rear seats fold down to offer 56.6 cubic feet of cargo space¹, which allows easy loading of large or odd-sized items. The rear cargo area features a deep well with an available false cargo floor for additional storage.

2. MOTION DESIGN. Michelin® Energy™ Saver All-Season tires with Selfseal® technology offer low rolling resistance and are designed to self-seal in the event of a minor tread puncture, such as that made by a nail. The specially engineered 17-inch wheels provide enhanced stiffness to help manage noise and vibration.

3. POWER IN THE PALM OF YOUR HAND. Electronic Precision Shift eliminates the need for a traditional mechanical linkage from the shifter in the cabin, providing more interior space and reduced shifting effort. Bolt EV is the first Chevrolet vehicle to offer Electronic Precision Shift, a technology that sends electronic signals to the drive system to select Reverse, Neutral, Park, Drive and Low.

¹ Cargo and load capacity limited by weight and distribution.

TECHNOLOGY

Bolt EV Premier interior in Dark Galvanized Gray/Sky Cool Gray with perforated leather-appointed seats.

¹ Vehicle user interface is a product of Apple and its terms and privacy statements apply. Requires compatible iPhone and data plan rates apply. ² Vehicle user interface is a product of Google and its terms and privacy statements apply. Requires the Android Auto app on Google Play and an Android compatible smartphone running Android 5.0 Lollipop or higher. Data plan rates apply. ³ Chevrolet Infotainment System functionality varies by model. Full functionality requires compatible Bluetooth and smartphone, and USB connectivity for some devices. ⁴ Service varies with conditions and location. Requires active OnStar service and paid AT&T data plan. Visit onstar.com for details and limitations.

Apple CarPlay and iPhone are trademarks of Apple Inc., registered in the U.S. and other countries. Android, Android Auto, Google, Google Play and other marks are trademarks of Google LLC.

ADVANCED INTELLIGENCE. Bolt EV comes standard with a 10.2-inch diagonal center console color touch-screen display that provides important information such as battery levels, range, energy usage, climate controls and infotainment features. Also standard is an 8-inch diagonal configurable Driver Information Center with a multi-color graphic display.

Apple CarPlay® COMPATIBILITY!

With Apple CarPlay, you can simply and smartly connect with some of your most used iPhone® features, including Maps, Music, Messages and Phone, right on the Bolt EV touch-screen display.

ANDROID AUTO COMPATIBILITY?

You can quickly and intuitively interact with select smartphone apps with support for Android Auto™. This system takes some of your compatible Android™ phone's features and lets you access them on the Chevrolet Infotainment System.³ You can access your phone, text messages, music, navigation and more.

Wi-Fi IN YOUR BOLT EV. Chevrolet offers available 4G LTE Wi-Fi⁴ that provides a better in-vehicle experience than your smartphone. Our strong signal means you have a fast and reliable connection for up to seven devices.

1. myChevrolet Mobile App! Simply download the app to your compatible smartphone and if your vehicle is properly equipped, you can start or turn off your Bolt EV, lock or unlock your doors² (requires paid subscription after trial), check charge levels and tire pressure, set parking reminders and more. Requires available Remote Access Plan³

2. ENERGY USAGE SCREEN. Want to know how much energy you're using? The Energy Usage Screen shows an index score based on factors that may influence energy consumption, such as driving technique, terrain, climate settings and outside temperature.

3. RANGE ANALYSIS. A Confidence Gauge is available in the configurable Driver Information Center and provides estimates of the longest and shortest range scenarios based on current vehicle conditions and climate settings.

¹ Available on select Apple and Android devices. Service availability, features and functionality vary by vehicle, device and the plan you are enrolled in. Device data connection required. Does not monitor spare tire. Visit onstar.com for details and limitations. ² Unlock feature requires automatic locks. Remote start requires GM factory-installed and enabled remote start system. Requires paid subscription. Services are subject to User Terms and limitations. ³ Remote Access Plan does not include emergency or security services. Visit onstar.com for details and limitations.

SAFETY

SAFETY STARTS WITH YOU. Safety features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather and road conditions may affect feature performance. Read the vehicle Owner's Manual for important feature limitations and information.

ADVANCED TECHNOLOGY MAKES SAFETY A TOP PRIORITY.

FRONT PEDESTRIAN BRAKING. At speeds up to 50 mph, this available system uses a forward-looking camera to survey the road ahead. If the system detects that a pedestrian is directly ahead and a collision is imminent, and the driver has not already applied the brakes, the system can alert the driver and may even automatically apply the brakes to help the driver avoid or reduce the harm caused by the collision. Performance is limited at night.

LOW SPEED FORWARD AUTOMATIC BRAKING. Available on Bolt EV, camera-based Low Speed Forward Automatic Braking can help mitigate collisions with detected vehicles. The system may even help avoid a collision at very low speeds. The system works at speeds below 50 mph.

FORWARD COLLISION ALERT. This available feature monitors how close your vehicle is to a detected vehicle in front of you. If the system determines that a front-end collision with a detected vehicle is imminent, it can alert the driver to a potential crash. It also can warn the driver if their Bolt EV is following a detected vehicle much too closely.

LANE KEEP ASSIST WITH LANE DEPARTURE WARNING. At speeds above 37 mph, the available camera-based system monitors road lines and will gently turn the steering wheel if the vehicle begins changing lanes without the use of a turn signal. Available on Premier only.

LANE CHANGE ALERT WITH SIDE BLIND ZONE ALERT. This available feature has radar sensors in the rear corners of the vehicle to help detect fast-approaching vehicles in the adjacent lanes as well as moving vehicles in the side mirror blind zones. Amber icons in the exterior mirrors indicate a vehicle's presence.

REAR VISION CAMERA. When traveling in Reverse at low speeds, the standard rear vision camera helps provide a real-time view of the area immediately behind your Bolt EV on the touch-screen display.

REAR PARK ASSIST. This available feature can help when driving in Reverse by providing distance-to-object alerts to help the driver park and avoid nearby detected objects directly behind the vehicle during low-speed maneuvering.

INTELLIBEAM HEADLAMPS. When oncoming headlamps are sensed or when taillamps are detected in front of the vehicle, the available IntelliBeam® high beam assist intuitively adjusts between low and high beams.

SURROUND VISION. This available feature helps with parallel parking and maneuvering at low speeds into tight spaces. Using four strategically placed cameras, Surround Vision gives you a bird's-eye view of the scene around your Bolt EV on the 10.2-inch diagonal color touch-screen display, allowing you to see the areas behind and around you.

REAR CAMERA MIRROR. The available Rear Camera Mirror technology can provide a wider, less obstructed field of view of the area behind your Bolt EV, compared to a traditional inside rearview mirror, with the easy flip of a switch on your rearview mirror. The mirror surface doubles as a video camera view that can assist when driving, changing lanes, and checking for vehicles and traffic conditions.

NEW VEHICLE LIMITED WARRANTY

NEW VEHICLE LIMITED WARRANTY GM vehicles registered in the USA are covered for 3 years/36,000 miles (whichever comes first). The complete vehicle is covered, including tires, towing to your nearest Chevrolet dealership and cosmetic corrosion resulting from defects. Repairs will be made to correct any vehicle defect, and most warranty repairs will be made at no charge. In addition, rust-through corrosion will be covered for 6 years/100,000 miles (whichever comes first). See dealer for details.

5-YEAR/60,000-MILE TRANSFERABLE POWERTRAIN LIMITED WARRANTY Every 2019 Bolt EV comes with a 5-year/60,000-mile (whichever comes first) transferable Powertrain Limited Warranty. Plus, you get 5 years/60,000 miles (whichever comes first) of the 24/7 Roadside Assistance Program and 8 years/100,000 miles of the Courtesy Transportation Program, and much more. See dealer for details.

BATTERY LIMITED WARRANTY Bolt EV battery and specific electric drive components are covered for 8 years/100,000 miles (whichever comes first). The Bolt EV battery warranty covers battery components in addition to the thermal management system, charging system and electric drive components. See dealer for details.

¹ Maintenance visit must occur within first year of vehicle delivery. Service visit consists of Tire Rotation/MPVI. Does not include air filter. See participating dealer for other restrictions and complete details. ² Whichever comes first. See dealer for details. ³ Roadside service provided by Allstate Roadside Services. Limitations apply. ⁴ Standard connectivity available only to original purchaser for 10 years. Connected Access services are subject to change. Does not include emergency or security services. Diagnostic capabilities vary by model and service plan. Message and data rates may apply. Requires contact method on file and enrollment to receive alerts. Not all issues will deliver alerts. Visit onstar.com for details and limitations. ⁵ Connected Services include navigation services and Remote Access Plan, and 1 month or 3 GB of 4G LTE data (whichever comes first) from vehicle delivery date. Data plans offered by AT&T. Services are subject to User Terms and limitations. Certain services require working electrical system, cell service and GPS signal. OnStar links to emergency services. Visit onstar.com for coverage map, details and system limitations. ⁶ Charging rate varies based on output of the charge unit, vehicle settings and outside temperature. ⁷ EPA-estimated 238-mile EV range. Your actual range will vary based on several factors including temperature, terrain and driving conditions. ⁸ Cargo and load capacity limited by weight and distribution.

IMPORTANT INFORMATION

CHEVROLET CONNECTED SERVICES AND ONSTAR Effective May 1, 2018, available Chevrolet Connected Services have changed significantly. While many of the offered services are the same, available plans and pricing are different. Connected vehicle services require a paid connected vehicle services plan or trial and connected hardware, vehicle electrical system (including battery), wireless service and GPS satellite signals to be available and operating for features to function properly. OnStar acts as a link to existing emergency service providers. Visit onstar.com for coverage map, details and system limitations.

CHEVROLET OWNER CENTER (MY.CHEVROLET.COM) Everything you need to know. Anything you need to do. Your Chevrolet Owner Center makes it easy. Create your account today to get the most out of your new vehicle. Get special alerts and offers, schedule service, review your maintenance schedule, and view how-to videos specifically for your vehicle. All online, anytime. Visit the Owner Center today to register or take a tour.

ASSEMBLY Chevrolet vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Chevrolet vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest you verify that your vehicle includes the equipment you ordered and that, if there were changes, they are acceptable to you.

A NOTE ON CHILD SAFETY Always use seat belts and the correct child restraint for your child's age and size, even with airbags. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal airbag. See your vehicle Owner's Manual and the child safety seat instructions for more safety information.

IMPORTANT WORDS ABOUT THIS CATALOG We have tried to make this catalog comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models and availability. Specifications, dimensions, measurements, ratings and other numbers in this catalog and other printed materials provided at the dealership or affixed to vehicles are approximations based on design and engineering drawings, prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been updated since the

time of printing, please check with your Chevrolet dealer for complete details. Chevrolet reserves the right to lengthen or shorten the model year for any product for any reason or to start and end model years at different times. Certain vehicle features may lose their usefulness over time due to obsolescence from technological changes. Unless otherwise noted, all claims based on GM Small Car segment and latest available competitive information. Excludes other GM vehicles.

SPARE TIRE INFORMATION There is no standard jack or spare tire in the 2019 Chevrolet Bolt EV. Your vehicle may have a tire sealant and compressor kit that uses a liquid tire sealant to temporarily seal up to a one-quarter-inch puncture in the tread area of the tire. After using the tire inflator kit, it is recommended that you take the tire to an authorized retailer for inspection and repair as soon as possible, but at least within 100 miles of driving. The tire sealant cannot seal and inflate sidewall damage, punctures larger than one-quarter inch, or a tire that has unseated from the wheel. The sealant can only be used on one tire and for one time before its expiration date.

CHEVROLET OWNERSHIP EXPERIENCE Chevrolet is committed to enhancing the vehicle shopping and ownership experience through a wide array of programs.
