This design shows two different Pika Energy Island systems installed at the same site. One system provides combined solar and storage, with backup power through the Protected Loads panel (12 kW surge, 8 kW continuous).

This configuration is acceptable with most 200A residential services.

Multi-Inverter Line-Side Tap / Solar + Storage [2324-01]

- 6 PV Links
- 2 REbus Beacons
- 2 Islanding Inverter
- 1 CT Kit
- 1 Pika Smart Battery
